 Project Experience

E-Commerce Review Scraping System

2023

Python Web Scraping Data Processing

- Developed Python-based scraping system to extract product reviews from Flipkart, Amazon, and FirstCry
- Structured and cleaned large-scale data including product IDs, ratings, and review dates

References available upon request | Portfolio: danishali087.github.io/portfolio-website

- **Key Achievement:** Processed 10,000+ reviews with 95% data accuracy
-

Full-Stack CRUD Application with Soft Delete

2023

Node.js Express.js PostgreSQL Bootstrap

- Built complete CRUD application with soft delete functionality for data recovery
 - Implemented backend validation and error handling middleware
 - Designed database schema with proper constraints and relationships
 - Created responsive frontend with user-friendly interface
 - **Key Achievement:** Reduced data loss by 100% through soft delete implementation
-

Contact Manager Application

2022

Angular TypeScript JSON Bootstrap

- Developed Angular-based contact management system with CRUD operations
 - Implemented component-based architecture with clean separation of concerns
 - Added form validation and responsive design for mobile compatibility
 - Integrated JSON data handling for contact storage
-

Static Business Website

2022

HTML5 CSS3 JavaScript

- Designed and developed responsive static website with mobile-first approach
 - Optimized for performance with fast loading times
 - Implemented clean typography and intuitive navigation
 - Ensured cross-browser compatibility
-

Key Achievements

References available upon request | Portfolio: danishali087.github.io/portfolio-website

- 🏆 Successfully scraped and processed data from 3 major e-commerce platforms
- 🏆 Implemented soft delete feature that eliminated permanent data loss
- 🏆 All projects feature responsive design with 100% mobile compatibility
- 🏆 Maintained code quality with clean architecture and proper documentation
