PROFESSIONAL SUMMARY

Motivated Junior Web Developer based in Ajman, UAE, with hands-on experience in full-stack development, WordPress, Shopify, and Python automation. Self-trained through intensive courses at NareshIT and practical project work, with demonstrated ability to build and deploy real-world web applications. Currently employed at a UAE-based company managing all digital and IT operations end-to-end. Strong self-learner who continuously upskills — live portfolio and GitHub projects available for review. Available immediately for a full-time junior developer role.

EMPLOYMENT HISTORY

IT & Web Developer (Multi-Role) | **Altaqniya LLC — UAE** — Nov 2025 – Present

- Rebuilt the company website from scratch using WordPress with responsive layouts and on-page SEO, reducing manual update time by 60%.
- Launched a fully functional Shopify e-commerce store with product listings, category structure, and payment-ready checkout flow.
- Optimized product listings on Noon Marketplace, improving catalog completeness and customer-facing presentation.
- Automated two business workflows using n8n: a daily weather Gmail report and a multi-account email broadcast system.
- Leveraged AI tools (ChatGPT, Gemini, Claude) to generate marketing visuals and web content, cutting production time by 50%.
- Managed Facebook Page and Marketplace listings, handling weekly customer inquiries on car pricing and availability.
- Sole technical resource overseeing all digital touchpoints from development to deployment and client communication.

TECHNICAL SKILLS

Languages: Python, JavaScript, HTML5, CSS3

Backend: Node.js, Express.js

Frameworks & UI: Bootstrap, Angular (Basic), Responsive Web Design

Databases: PostgreSQL, SQL

Bachelor of Technology — Computer Science & Engineering

GITA Autonomous College, Bhubaneswar | BPUT, Odisha, India Aug 2018 - May 2022

CGPA: 7.88 / 10 (approx. 73.8%)

KEY PROJECTS

Full-Stack CRUD Web Application | Node.js • Express.js • PostgreSQL • Bootstrap

- Developed and deployed a full-stack web application on a live server with complete CRUD operations and soft-delete functionality.
- Built RESTful API backend using Node.js and Express.js connected to a PostgreSQL database, with a responsive Bootstrap frontend.

Large-Scale Web Scraping & Data Pipeline | Python • BeautifulSoup • Scrapy

- Scraped 10,000+ product and review records per run from Amazon, Flipkart, and FirstCry with validation, deduplication, and CSV output.

Contact Manager CRUD App | Angular • Bootstrap • SPA

- Single Page Application with full CRUD and soft-delete, structured with component-based Angular architecture and Bootstrap responsive UI.

n8n Workflow Automation

- Daily weather Gmail notification at 8 AM and a multi-account email broadcast system sending distinct messages from 3 accounts simultaneously.
